## Fish Attractor Map

### About the Fish Attractor Program...

The Kentucky Department of Fish and Wildlife Resources, along with the United States Forest Service (Daniel Boone National Forest), and the United States Army Corps of Engineers have been creating habitat sites on Cave Run Lake since the early 1980's. Recently, efforts have been made to maintain a series of "small sites" on the lake. These 16 sites are made up primarily of Christmas and cedar trees but also include some pallet structures and plastic structures.

In 2014 a large scale habitat project was under taken on Cave Run Lake. The goals of this project were to create additional habitat sites on a much grander scale. To date this project has created 3 habitat reefs (covering around 2.5 miles of shoreline) and 15 individual sites (covering several acres of lake bottom). These large sites are made up of a mixture of habitat material including small and large cedar trees, pallet structures, culverts, wooden stumps, stake buckets and wooden wire spools. This project is aimed at increasing forage within the lake as well as providing anglers additional places to focus their fishing.

### How to Use This Map...

This map is designed to increase your odds of finding these habitat sites. GPS coordinates are provided to assist with this (see the table to the right). Coordinates will get you in the vicinity of the site, but depending on your model of GPS, the weather and cloud cover may not put you directly on the site. In addition to the GPS locations the type of material and the date of refresh are also provided.

The 3 habitat reefs on the lake are a collection of all habitat types. The GPS coordinates for the starting and ending points on these reefs are provided (see the table to the right) as well as the depth (at summer pool levels) of these reefs. These reefs have hundreds of structures within these depths and GPS points.

### How You Can Help...

We are always looking habitat to add to the lake. If you have large quantities of environmentally friendly material to add to the lake please call 606-783-8650 for information about donating.

### Fishing Regulations for Cave Run Lake...

- Giggling and Snagging is prohibited in the main lake and all tributaries up to the first riffle. The location of the first riffle may changed depending on water levels.
- All species not found on the table below fall under the statewide regulation for size and creel limits.

Species	Size Limit	Daily Creel Limit
Largemouth Bass	13" - 16" slot*	6 fish combined
Smallmouth Bass	18" minimum	
Spotted Bass	None	
Muskellunge	36" minimum	1 fish

\* All largemouth bass caught between 13 and 16-inches must be immediately released.

### Fish Attractor Locations

SITE	SITE NAME	TYPE	NORTHING	WESTING	DATE
01*	Billy Branch	Trees Small	38.102750	-83.512667	2015
02	Twin Knobs Ramp	Mixed Small	38.09815	-83.512767	2015
